

In this support note, we will give you the steps on installing the Positions Mobile extension. Before you get started, you will want to find the latest version of Positions Mobile extension that is compatible with the ArcGIS® for Windows® Mobile installed to your GPS device and version of Trimble Positions Desktop add-in that you have installed to your computer. You will also need to make sure that the version of Positions Mobile Extension is compatible with your GPS unit. You can check the [compatibility chart](#) for assistance. If you need to install the Trimble Positions Desktop add-in, please see the support note [Installing Trimble Positions Desktop Add-in](#).

To install the Trimble Positions Mobile Extension:

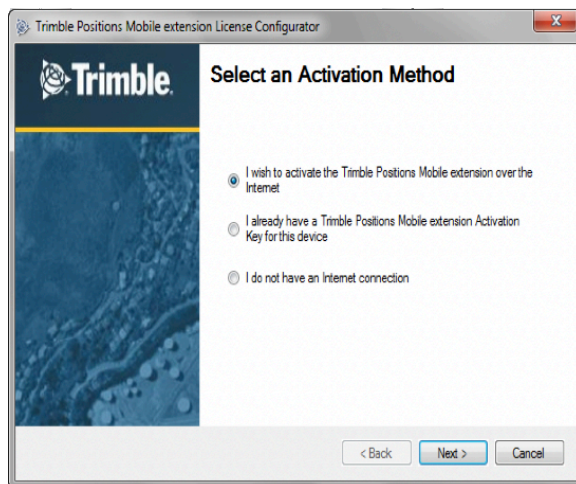

1. Download the Trimble Positions Mobile extension from the [Trimble Website](#). You will need full administrative rights to your computer while installing this software.
2. If you have an older version of Trimble Positions Mobile extension, you must uninstall it before starting a new installation process for Positions Mobile extension. You can uninstall the software by going on the GPS unit to *Start> Settings> System> Remove Program* then select the software and press the Remove button.
3. You will also need to have Windows Mobile installed prior to install the Trimble Positions Mobile extension.
4. Run the installation file that you just downloaded from the Trimble website. Install the Trimble Positions Mobile extension by following the on-screen instructions.
5. After installing the Trimble Positions Mobile extension, you will need to install the Trimble Positions Mobile Project Center extension that comes with the Trimble Mobile extension installer by following the on-screen instructions.

To activate Trimble Positions Mobile Extension:

Use the Trimble Positions Mobile extension License Configurator under *Start> All Programs> Trimble> Trimble Positions Mobile extension* to license the extension

1. Choose the option to Activate as a single use Installation Code
2. Insert your Trimble Positions Mobile extension installation code and select *Next*.
3. Choose the option *I wish to activate Trimble Positions Mobile extension over the Internet* and select *Next*.
4. The activator should now contact the Trimble License Sever and activator you license and then you will get a message that you license was successfully activated.

Note: You can find your installation codes registered to your [Trimble account](#). You will only have a POPN from the initial software purchase. Once you have registered your POPN, it is voided and you are given the installation code for future installation.

You will need to have ActiveSync® (Windows XP) or Windows Mobile Device Center (Windows 7 or Vista) installed in order to connect your GPS device to your computer. You can find the downloads for those [here](#).

If you have any complications getting the software installed, please contact your sales rep or email support@elecddata.com.
